

The Cowan Connection

VW Americas Expo & Conference 2017

It's a wrap! The Cowan team is back after exhibiting at the Valve World Americas Expo & Conference 2017 in Houston. We had the opportunity to showcase our E2H Series as well as our C-PAC Module.

Thanks to those who stopped by!

Cowan's New C6A Series

Cowan's C6A Series is now available.

The API 6A Hydraulic Actuator has a nominal pressure of 3000 psi / 5000 psi with a closing time of ≤ 5 seconds.

The C6A has a self-contained ESD system that is designed to provide reliable valve shutdown capability when an external power source is either not available or not dependable. This easy to operate ESD system is integrated on one manifold and its enclosed system allows the unit to be installed at any angle necessary. Its specialized troubleshooting design provides a quick self-diagnosis system.

Product Highlight

A²A Booster

250 psi Air-to-Air Booster

Air driven, double-acting pressure amplifiers
4:1, 3:1, 2:1 Intensification Ratios
High air flow output 100 cu in per stroke

Consisting of a basic system plus an air-to-air booster, Cowan's pneumatic booster air systems are designed for applications in which the available air pressure is too low and where space for additional air tanks is limited.

The A²A system's design is compact, lightweight, and corrosion resistant. This system is up to 85% smaller, up to 45% lighter, with up to 40% cost savings than a conventional system.
