Here's a closer look: the hydraulic pump and key components are seamlessly integrated into a compact, efficiently designed manifold block — complete with limit switches for precision control.

Industry's Top Choice for Precision & Reliable Valve Automation

Self-contained Unit – An efficiently designed, self-contained solution, reducing the need for complex piping hydraulics.

Remotely Controlled – Seamlessly integrates with control systems for reliable shutdown and emergency operation.

Fail-Safe Performance – Ensuring safe, reliable shutdown when it matters most.
